Reduce Monthly Phone Costs

What are the Typical Cost Savings with VoIP?

- The average savings that businesses see after switching to VoIP range between 50% to 75%
- 99.99% of customers see a reduction in their yearly phone expenses

How are VoIP Savings that Drastic?

- Reduced initial set up and installation costs
- No premise based bulky hardware to install
- Elimination of expensive monthly fees & upgrades
- Making changes to your phone system is easy
- No long-distance charges
- Everything is handled off-premise "In the cloud"
- Scaling operations for the future is not complicated

Typical Cost Savings with VoIP:

Telephone Line Costs. A traditional phone line can be replaced with a SIP Trunk. This saves up to 50% on your monthly phone bill and adds performance features like Direct Inward Dialing.

Direct Inward Dial. Taking advantage of Direct Inward Dial (DID's) numbers allows workers to have a direct telephone line number so their calls do not need to go through a receptionist.

Voice mail to Email. Voice mail to email sends all voicemail messages to an email inbox. In today's mobile world It's nice to receive the voice messages on your mobile phone or email after hours so you can contact the customer if the situation requires it. This increases customer service and efficiency of work force.

Maintenance Cost Reductions. Since VoIP works differently than traditional old fashioned telephone systems, it is possible to reduce costs of moving phones around. Each VoIP phone is an extension off the phone system. Users can simply unplug their phone from the Network and move it anywhere they wish

How to Switch

Interested in switching to Accelerated Technologies? Call 561.427.0600 to receive a customized quote detailing the benefits of utilizing our innovative products and services. When you're ready, we'll install your new phone system with ZERO downtime, so you can get back to business.
